SUMMARY

Senior Software Engineer with 3.5+ years of experience in backend development, specializing in building high-performance, scalable, and reliable systems. Proven track record in driving technical design discussions, mentoring junior engineers, and delivering end-to-end solutions. Eager to tackle challenging problems and continuously enhance skills to contribute to organizational success.

SKILLS

Core Development: Java, Spring Boot, Microservices, MySQL, Marklogic Db, Data Structures & Algorithms, System Design, Multithreading, Spring Security, Kafka, AWS.

Development Tools: IntelliJ, Postman, JUnit, Git, CI/CD, Debugging, Agile, OpenAI.

EXPERIENCE

Senior Software Engineer | *Ubona Technologies, Bengaluru* | Sep 2024 – Present

- Engineered a scalable **AI-powered Speech Analytics platform** to automate the analysis of inbound/outbound calls. This **solved the limitation of manual call audits** by providing comprehensive, organization-wide business insights for banking and insurance clients.
- Built a multithreaded data pipeline to automate the analysis of over 15,000+ daily call recordings, **which reduced process time by ~30% and improved resource utilization**.
- Implemented a secure **Single Sign-On (SSO)** authentication flow **using Spring Security and SAML**, which accelerated client onboarding by **~50%** and provided seamless access to the Speech Analytics dashboard using official credentials.
- Led a team of 3 developers, contributing to feature design and code reviews, to ensure high-quality and maintainable code.
- Tech Stack: Java, Spring Boot, Microservices, Spring Security, MySQL, OAuth2, SAML, AWS S3, Bash, Multithreading.

Specialist Programmer | *Infosys Ltd, Bengaluru* | Jul 2023 – Aug 2024

- Spearheaded the re-engineering of a legacy monolithic system for a BNSF logistics client. The new high-performance, **Kafka-based microservices** platform overcame limitations of slow processing and lack of scalability.
- Re-architected monolithic systems into **modular microservices**, which improved scalability by 3x.
- Refactored SQL logic and implemented **caching strategies**, enhancing database performance by 50%.
- Initiated code quality efforts by optimizing the codebase with SOLID principles and ensuring **over 85% code coverage**.
- Tech Stack: Java, Spring Boot, Microservices, Kafka, Zookeeper, DB2, REST APIs, Multithreading.

System Engineer | *Infosys Ltd, Pune* | Jan 2022 – Jun 2023

- Delivered backend features for a key client using Java and Spring Boot, consistently achieving a **100% on-time delivery record across multiple release cycles**.
- Contributed to code quality by conducting thorough code reviews and bug resolution, lowering 25% post-release defects.

PROJECTS

Asynchronous Order Tracking System ([link](#)) | Jun 2025 – Jul 2025

- Developed an **Asynchronous Order Tracking System** with a multi-module, **event-driven architecture** to **reduce latency** and **improve resilience**. Key features include an automated email notification service and logic to automatically revert stock for cancelled orders. Built using **Kafka, Spring Boot, Java, and MySQL**.

ACHIEVEMENTS

- Best Performer Award | *Ubona Technologies* | Jan 2025
- Ace Performer | *Infosys* | Jun 2024

EDUCATION

Advanced Software Development Program | *Scaler by InterviewBit* | 2020–2022

Bachelor of Engineering | *Saraswati College of Engineering, University of Mumbai* | 2016–2020
